Portfolio: <https://marvelousdev.vercel.app>

## OBJECTIVE

A motivated and detail-oriented Frontend Developer with strong technical skills in building responsive, user-friendly, and efficient web applications. Passionate about solving real-world problems through clean and efficient code, and eager to apply my knowledge in a collaborative environment that encourages learning, innovation, and continuous professional growth.

## TECHNICAL SKILLS

**LANGUAGES:** HTML, CSS, JAVASCRIPT, C++, TYPESCRIPT

**FRAMEWORKS & LIBRARIES:** REACT.JS, NEXT.JS, FRAMER-MOTION, CHART.JS

**STYLING:** CSS, SCSS, BOOTSTRAP, TAILWINDCSS

**BACKEND/SERVICES:** FIREBASE(DATABASE)

**TOOLS:** GITHUB, VSCODE, GIT

**CONCEPTS:** RESPONSIVE DESIGN, FLEXBOX, CSS GRID, MOBILE-FIRST DESIGN

## EXPERIENCE

### INTERN, DUFIL PRIMA FOODS LTD

Mar 2026 - Present

During my internship, I have been actively involved in developing and improving user interface components based on tasks assigned by a senior developer. I have built and tested responsive web interfaces using modern frontend technologies while continuously strengthen my practical development skills through both assigned tasks and personal frontend projects

## EDUCATION

### LAGOS STATE UNIVERSITY (2023 – 2027)

Bachelor's Degree in Computer Science

## PROJECTS

### BUDGET TRACKER WEB APPLICATION [SCSS, REACT.JS]

This project is a dynamic web application developed to help users track income and expenses efficiently. It utilizes React state management to handle real-time updates of transactions and is styled with SCSS to provide a clean, responsive and user friendly interface.

**GENJO TEACHER (ONGOING PROJECT) [TAILWINDCSS, REACT.JS, TYPESCRIPT, FRAMER-MOTION]**

Genjo Teacher is an interactive learning platform currently in development, designed to help users learn Igbo at their own pace. The application is being built in collaboration with a backend developer, with the focus of API integration, smooth animations using Framer motion, and modern UI/UX practices to enhance user engagement.

**BIBLE STUDY QUESTION & ANSWER WEBAPP [NEXT.JS, FIREBASE(DATABASE)]**

This is a full stack web application that allows users to submit and view Bible-related questions while enabling administrators to respond and manage content. It leverages Firebase for real-time database functionality and is built with Next.js

**PRODUCT LISTING WITH CART (FRONTEND MENTOR CHALLENGE) [HTML, CSS, JAVASCRIPT]**

A functional e-commerce interface that includes a shopping mart system with features for adding and removing items as well as real-time price calculations. The application is full responsive and focuses on delivering a clean and intuitive user experience and was built during my journey of learning from FRONTEND MENTOR CHALLENGE

**HEALTH SHIELD AI [SCSS, REACT.JS, FRAMER-MOTION]**

Health Shield AI is a multi-platform health assistant application for which I developed the frontend interface. The project leverages AI and machine learning to provide health-related services, including chat, symptom assessment, and predictions. This project came to life with the collaboration with a backend developer who handled the server-side logic.

---

COMMUNICATION

I communicate ideas clearly and effectively, both in writing and verbally. I am comfortable explaining technical concepts, asking questions, and collaborating with others to achieve common goals.
